

Communication – issued 12/11/2019

RFP Update Notice

On December 10, 2019, Mesa County Libraries' East Valley Project Steering Committee ("the Committee") met as scheduled to review the status of the Clifton Branch Capital Project and create a tentative timeline for the project. Several community/partner opportunities were discussed that affect the project timeline. One of those opportunities involves having architectural and construction management students create conceptual renderings of the project based on the community assessment completed in November. This opportunity would be semester-based and expected to be completed by December 2020.

With this opportunity, the Committee decided to defer hiring an Owner's Representative until further down the timeline – tentatively Winter 2020. A new RFP for Owner's Representative services will be issued at that time using the project scope determined by the student conceptual renderings.

Updated information can be found on our website at
